

High-performance CR for veterinary medicine

Fast, reliable, and easy to use

KODAK DIRECTVIEW CR Systems are now available with software customized for veterinary medicine. These premier computed radiography systems provide the productivity, sophisticated image processing, and system capabilities required by veterinary schools, hospitals, and group practices. All systems are network enabled and DICOM compliant.

They readily interoperate with medical imagers and PACS. Each delivers the image quality and performance you expect from Kodak and is backed by prompt, expert Kodak service and support.

Customized veterinary software

- ▶ Kodak veterinary software is designed specifically for acquiring diagnostic-quality veterinary images with DirectView CR systems.
- ▶ An intuitive user interface accommodates small-animal body parts, projections, and procedures lists.
- ▶ Optimized image processing is specifically tailored for imaging small-animal body mass, skin lines, hollow bones, feathers, etc.

Easy to use

- ▶ The intuitive user interface is designed for ease of learning and use.
- ▶ A bar-code reader for patient/cassette/exam ID saves time and effort.
- ▶ Unique profiles of multiple destinations can be pre-selected.
- ▶ Preset image display parameters can be customized to suit preferences.
- ▶ Patient records can be ordered to appear on the worklist screen according to user preference—alphabetical, oldest first, newest first.

Which KODAK DIRECTVIEW CR System is best for you?

Take your choice of three high-performance CR systems

KODAK DIRECTVIEW CR 950 System

Provides centralized multi-cassette CR processing with decentralized workflow. Manages 16 cassettes simultaneously with "drop-and-go" processing for up to 86 cassettes an hour.

KODAK DIRECTVIEW CR 850 System

A single-cassette system that puts speed where you need it. Ideal for decentralized applications, it is streamlined for easy placement. Processes up to 104 cassettes an hour.

KODAK DIRECTVIEW CR 500 System

Provides small size without compromise for moderate exam volumes. This fast tabletop system processes more than 60 (35 x 43-cm) cassettes an hour.

Rugged and durable

- ▶ Robust Kodak DirectView systems are designed, manufactured, and tested for reliability and durability—to minimize downtime and maximize return on investment.
- ▶ Rugged, reliable CR readers are built for long, dependable operation.
- ▶ Durable CR screens and cassettes stand up to repeated use with no visible artifacts.

Works smarter

- ▶ Computed radiography lets technicians work entirely in daylight or full roomlight conditions.
- ▶ Depending on the system, 1,500 or 2,000 images can be stored on-line for rapid recall and reference.

Buy/lease options

- ▶ Purchase and leasing plans are available to suit a variety of budgetary and cash-flow demands.

PACS, too!

- ▶ Kodak's solutions for veterinary medicine also include the Kodak DirectView PACS system. Flexible and easily scaled to suit your business, this Web-enabled PACS provides prompt access to CR images and other digital images and reports—*anywhere at any time*.
